

I-PLUGTH

TEMPERATURE AND HUMIDITY DATA LOGGER

Specifications

Temperature range : -40°C / +65°C (-40°F / 149°F)

Temperature resolution : 0.01°C

Temperature accuracy : 0.3°C

Humidity range : 0 – 100 %

Humidity accuracy : 2%

Humidity resolution : 0.04%

Dimensions : 73 x 15 x 33 mm

Memory capacity : 30 000 readings

Power : 3V

Weight : 30g

Shelf life : 1 year after production date

Connection to PC : USB 2.0

System requirement for reading : Internet connection

Features and Benefits

- Connects directly to USB Port
- View and save readings online
- High & low temperature alarm LED indicators
- Start and Stop button (for unit without LCD screen)
- User programmable Start delay
- User programmable durations
- User programmable sampling interval
- Encrypted memory
- 2 digital sensors
